DABBOX[®]

Perfectpro offers a unique range of 3 compact worksite radios. These radios, although compact in size, are all rain-, dust- and shock-proof and have a big sound capacity. This makes these radios suitable for both in- and outdoor work. Contemporary design, easy to operate and made for tradesmen who enjoy their music while at work.

All Perfectpro worksite radios are JIS4 certified. This means that they are rain-resistant on all sides. We consider this essential for a worksite radio.

Both the Toughbox and Dabbox have a built-in battery charger for charging universal size C Ni-MH batteries. This offers you the freedom to listen to your music any time and anywhere. * Batteries not included.

A good, clear FM-reception is guaranteed by the digital PLL-tuner. The LCD displays all the information clearly. There are 5 presets for your favourite stations.

LUNCHBOX[®]

TOUGHBOX[®]

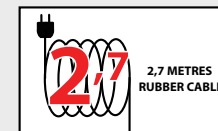

DABBOX[®]

The Dabbox is developed for DAB, digital radio reception. Beside this, it can also receive the FM RDS signal which displays station name, time/ date etc. on the LCD.

Both Toughbox and Dabbox have aux-in ports for playback from your MP3 player or iPod.

All the radios in the compact worksite radio series have a 2.7 metres long rubber cable that can be rolled up quickly and easily on the back of the radio.

All Perfectpro worksite radios are made of ABS plastic. This impact-resistant material is just one aspect that makes this radio suitable for use on building sites.

Perfectpro offers a 2 year warranty on all radios.
