JOBSITE RADIOS FOR TRADESMEN

PerfectPro has been specialised in the development and manufacture of jobsite radios for pros for more than 15 years.

You can hear our jobsite radios at building sites, manufacturing facilities, warehouses, workshops, sheds, stables and on scaffolds. They are also popular in garages, studios, farms, events, shipyards and in marinas. In other words: wherever people are hard at work and demand the clearest and highest-quality sound.

HI-FI: ALL PERFECTPRO RADIOS FEATURE AN IMPECCABLE SOUND.

PerfectPro radios can compete in quality with the most high-end Hi-Fi brands. We know it's all about the perfect sound. Each radio has been designed by audio lovers from the highest-quality parts based on the latest technology. Sound – and not the battery system – is key when it comes to our audio equipment.

HEAVY DUTY: ALL PERFECTPRO RADIOS ARE RUGGED ENOUGH TO WITHSTAND ANYTHING.

A PerfectPro radio will continue to play without missing a beat even under extreme conditions. They are waterproof, dustproof and shock-proof, solidly built and feature thick rubber control buttons that are easy to operate and keep clean.

PROFESSIONAL: ALL PERFECTPRO RADIOS ARE CUSTOM-MADE FOR PROS.

For any pro, PerfectPro radios can run on a universal battery at least an entire workday. Because we know that different pros need different sound solutions, PerfectPro has therefore built a wide range of devices over the years to ensure it meets all the specific requirements.

An audio solution for any setting

Dust, sand, moisture, water, falls, knocks, shocks, heat or cold: our radios can handle it all! Our portable battery-operated radios are exposed to a multitude of stresses and strains in any kind of environment.

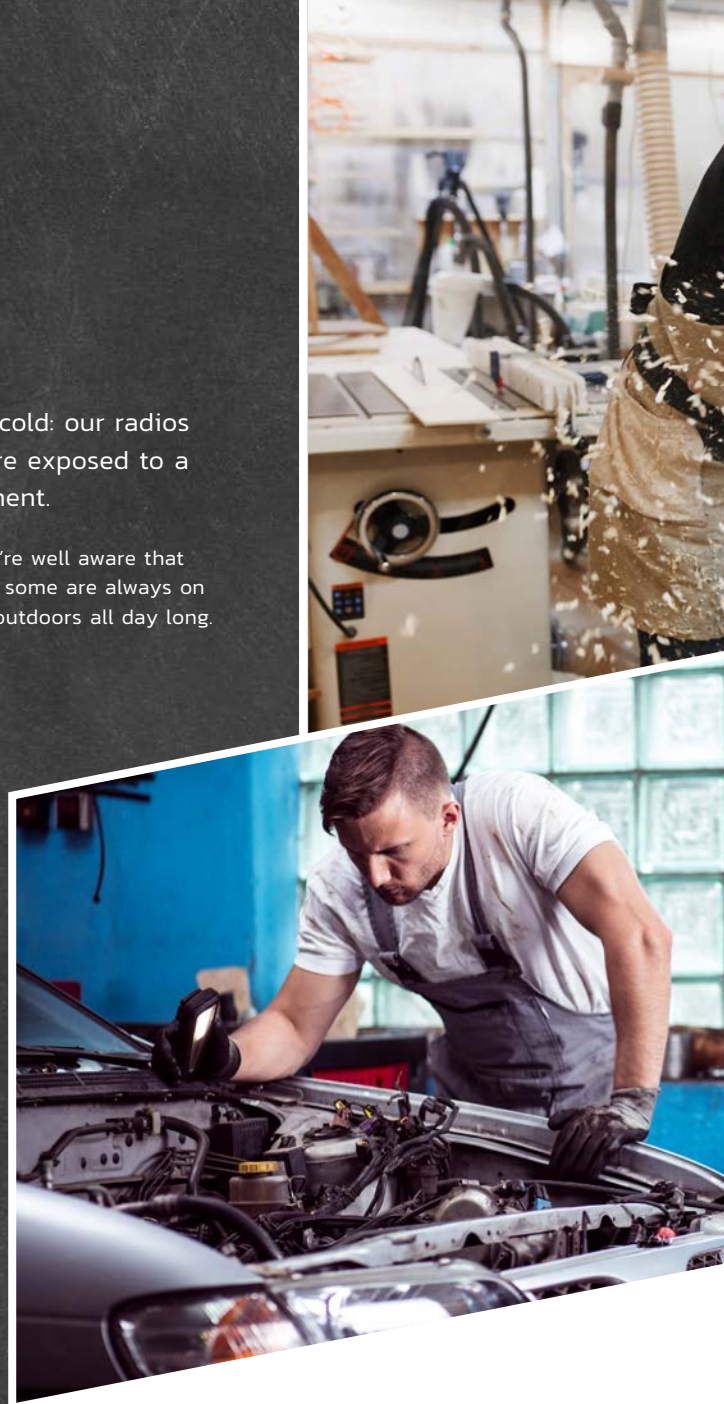

A huge variety of professionals use our audio tools every day, and we're well aware that each professional has slightly different needs and requirements. While some are always on the go, others stay within their own workshop and others again work outdoors all day long.

WIDEST RANGE OF JOBSITE RADIOS ON THE MARKET

To meet the needs of all our customers, we developed a very wide range of products: from the smallest jobsite radio to the largest model and from the most basic high-quality radio to the most sophisticated multifunctional all-rounder.

OUR TYPICAL AREAS OF APPLICATION

When you're listening to music within a small, confined indoor space, you don't need the same capacity to 'fill the room with sound' as when listening, say, on a scaffold outdoors. We generally use three categories based on which we continue to enhance and improve our radios – as shown in the table below.

GUIDELINES* BY CATEGORY

	SMALL	MEDIUM	LARGE	XL
POWER OUTPUT (WATT)	2 – 7	7 – 15	15 – 50+	50+
SURROUND-SOUND INDOORS** (NUMBER OF SQ. M.)	up to 150	up to 500	up to 1,000	1,000+
SURROUND-SOUND OUTDOORS (IN METRES OF DISTANCE TO RADIO)	up to 10	up to 25	up to 50	50+

* These are general guidelines; there are several outliers in both directions.

** Based on a warehouse with stacked boxes (reference space).

Our audio equipment provides a lot more than radio capability alone

Do you find yourself at a location with or without FM or DAB+? Can't get a mobile signal or is your phone running out of juice? Our devices are more than just a radio or Bluetooth speaker – they can play multiple media independently on a basic display, ensuring that our audio equipment always works no matter where you are.

WIFI

The Wi-Fi radio of the future! Wi-Fi radio gives you access to thousands of radio stations all over the world – crystal clear, and in stereo over the internet. Connect to any hotspot and listen to local world radio or the latest podcasts with just one push of a button. Especially great for workshops with a hotspot but with poor DAB+ reception.

FM RADIO

FM radio is here to stay! Whereas DAB+ radio reception can be tricky in large buildings or remote areas, there's always good old FM to back you up. Problem solved – as all our radios have FM capabilities.

FM RADIO

DAB+

The genuine 21st-century digital radio, as clear as a bell and as user-friendly as it gets. If there's no coverage, you can simply switch to trusty old FM.

AUX IN

Need a break from radio? All you need is a basic audio cable to connect any device with a headphone jack and play it on your PerfectPro radio.

CALL SPEAKER

A built-in microphone allows you to turn your radio into a call speaker – convenient for when you need to take a call but don't want to interrupt your work.

POWER BANK

Our radios are equipped with strong batteries which can double as power banks with 5V/1.2A output. Connect the phone to the USB port and it will be charged in no time.

USB

Download your favourite playlists to a USB stick and play them directly on your radio. This means no fiddling around with phones or other devices when you simply want to listen to your favourite playlists.

BLUETOOTH

Transform your radio into a high-quality Bluetooth speaker and listen to your own audio thanks to the Bluetooth interface. You can play anything from your computer or phone directly on your radio.

We never compromise on the quality of our materials

It's all about producing the highest-quality sound. Every one of our radios has been created by audio lovers using superior components based on the latest, state-of-the-art technology.

DUSTPROOF

Since no workshops and outdoor spaces are immune to dust, sand and gravel, all our radios provide a high degree of protection against any type of ingress or intrusion.

SHOCKPROOF

Having 15 years of experience repairing devices damaged by rough or inattentive use, we keep updating the interior and exterior of our products with innovative, smart and shockproof features.

WATERPROOF

Rain, sweat, wet building sites, a night spent on a scaffold, rough weather out at sea... our radios have experienced it all. That's why all our radios provide a high degree of water-resistance.

ALL PERFECTPRO RADIOS ARE MANUFACTURED FROM HIGH-QUALITY COMPONENTS

ERGONOMIIC PROTECTIVE CAGE

Reinforced with rubber shock absorbers and a hand grip. Option to switch the radio to a pivot position.

USB-PORT

Featuring rubber protection for water-resistance. Plays MP3, AAC & FLAC files.

FLEXIBLE FOLDABLE ANTENNA

The customised antenna is flexible enough to absorb shocks. Optimised reception for DAB+ and FM, including in spaces filled with iron objects.

CHUNKY RUBBER BUTTONS

To ensure simple operation – including with gloves – the buttons are supersized and made from rubber.

15 WATT NEODYMIUM SPEAKER

High-quality neodymium magnets are ultra-strong, ensuring a compact, lightweight radio combined with a high output power.

INTEGRATED LITHIUM-POLYMER BATTERY

Booster for extra power output, as well as extra-long (18-24 hour) playback.

EXTRA-LONG NEOPRENE CABLE

Resistant to wear and tear after contact with heavy-duty work shoes, building materials and operating equipment and devices.

PERFECTPRO BATTERY SYSTEM

Universal battery system customised for jobsite radios

WIRELESS THROUGHOUT THE WORKDAY:

Virtually all PerfectPro radios feature an integrated charger and a universal battery system.

LITHIUM BATTERY INSIDE

INTEGRATED LITHIUM BATTERY

We have integrated lithium batteries (Li-ion or Li-poly) into all our jobsite radios that require a high capacity or must be very small in size. With their high current density, lithium batteries are highly suited for models requiring extremely high capacity or which must be highly compact.

NIMH BATTERIES

The universal NiMH batteries are high-quality batteries designed especially for PerfectPro. More powerful than common types of consumer batteries, yet still universally exchangeable with other electronics. Long-lasting and packed with power.

WARRANTY

Since the charger for PerfectPro's jobsite radios and the PerfectPro chargeable NiMH batteries are fully complimentary, we recommend using PerfectPro chargeable NiMH batteries.

UNIVERSAL BATTERY PACKS

WHY A PERFECTPRO BATTERY?

LOW-PRICED

Our battery system has been optimised to keep radios blasting throughout the workday – not just while operating a chainsaw or a grinder. Why use the expensive power-tool battery for your jobsite radio?

INTEGRATED CHARGER

Our radios have built-in chargers – this means you never need to remove the battery. Convenient, right? Plug in your radio and it will keep going for the rest of the workday. The batteries of most of our models also charge while playing.

UNIVERSAL

PerfectPro has opted for universal-size batteries (AA, C and D). These always fit and are not – as is often the case with tool batteries – brand-dependent and subject to regular changes in size and connection. In addition, these universal-size batteries are available everywhere at an affordable price, in both chargeable (NiMH) and non-chargeable (Alkaline) versions.

WHY OUR BATTERY SYSTEM?

FIT FOR...		BRAND SYSTEMS
	PURPOSE PerfectPro batteries are designed specifically for the radio into which they're integrated.	PROFIT Other jobsite radios are designed to use a battery system developed for completely different purposes.
POWER	 Suitable for keeping the radio on all day long .	 Suitable for using power tools, for example short with a sporadically high capacity.
SIZE	 Small. Perfect for radio.	 Large. Designed for other devices.
WEIGHT	 Lightweight. Only needs to supply the radio with power.	 Heavy. Must also be able to operate a grinder or drilling machine.
PRICE	 Low. The battery for a jobsite radio need not cost more than 10% of the total price	 High. Why would you spend more than ±35% of the total price on the battery to get your sound? Wouldn't you rather use that battery for your power tools?
SUSTAINABILITY	 High. Batteries will still be available 10 years from now.	 Variable. The systems will change every few years.

'I listen to the radio during the daytime, while I'm at work (painting) and so far it's exceeded my expectations. It's small and compact and when the radio is hooked up to the mains current and is playing music, the battery just starts charging! How perfect is that? Once the battery is fully charged, you can play it at a medium volume for up to three days. Sure, the radio costs a little more, but it's well worth the investment!'

- P. EVANS, PAINTER

POWERPLAYER

The leading multifunctional model

This model is equipped with a high-performance neodymium speaker powered by an integrated Lithium-Polymer (Li-poly) battery. This makes it highly compact and lightweight, while at the same time offering a high power output and long playback time.

SMALL

Modest high-performance powerhouses

XL CLASS

A league
of its own

Among tradesmen "the Rockhart" enjoys more fame in its home country, the Netherlands, than the brand PerfectPro itself. With its two massive woofers it blows away anything bold enough to come close, if needed. Although its sound is also great when put at a lower volume, it has earned its reputation of the largest and loudest jobsite radio ever made.

I can keep the radio blasting all day long – no problem! The battery's in and will remain there. No fuss, no need to take it out – just plug it into the socket every so often and you're good to go – all day long.'

- P. BROWN, OPERATOR

LITHIUM
BATTERY
INSIDE

FM RADIO

MULTIFUNCTIONAL AUDIO TOOL

The Rockhart can be used as FM or DAB+ radio. It is also is about the largest and loudest bluetooth speaker on the market.

The headphones that aren't really headphones

The high-quality waterproof 360° Neodymium speaker is designed to provide the user with a unique audio experience. As with headphones, you're surrounded by sound when you clip it to your belt or shirt pocket. It will also easily fill a small space with a rich and full sound.

CHECK
OUT THE
SOLOWORKER ON
PERFECTPRO.EU

SOUND BUBBLE

The Soloworker creates a sound bubble for the user, immersing them in an audio experience like no other without intruding on anyone around them. And unlike headphones, it doesn't drown out external noise – you'll have no trouble hearing what's going on around you. All the better when you happen to be handling dangerous equipment.

LITHIUM
BATTERY
INSIDE

INTEGRATED LITHIUM BATTERY

The Soloworker has an integrated Lithium battery. With their high current density, lithium-ion batteries are highly suited for models which both require extremely high capacity and must be highly compact at the same time.

SPEAKER
AT THE
TOP

MOBILE OCCUPATIONS

If you routinely work at heights, move around a lot, or alternate between different projects all day long, this is the device for you. Clip it on and you'll be able to enjoy the highest-quality sound no matter where you go.

'WET' OCCUPATIONS

Do you spend considerable time working outdoors in the rain, in other 'watery' environments, or do you need to be able to clean your device? The waterproof speaker ensures this will never be a problem.

CABIN OCCUPATIONS

If the cabin of your crane, forklift truck, tractor or boat does not have an integrated radio, you can take the Soloworker with you anywhere – and it will fill your cabin with sound with a push of a button.

The PerfectPro Soloworker also has DAB+ capability. What is DAB+ exactly and how is it different from FM?

DAB+ RADIO RECEPTION WORKS DIFFERENTLY THAN FM RADIO RECEPTION

- FM will still give you a weak but listenable mono signal for most channels – although there will likely be some interference (fuzzy or cracking sound quality).
- DAB+ reception is digital, and if there's no signal you won't hear anything – not even a lower-quality sound, as with FM. This has nothing to do with the radio, but with the fact that there's a weak DAB+ signal at the site in question.
- DAB+ general rule: no reception = no sound.

WHAT TO DO IF YOU DON'T IMMEDIATELY HAVE DAB+ RECEPTION.

- You must always maintain the antenna in a straight vertical position.
- Keep your radio at a safe distance from potential interference sources such as LED lights, battery chargers, rotating machines, computers, large metal surfaces, etc.
- Turn the radio on and activate a full scan in the DAB+ menu.
- You can track the scan's progress in the radio's display window, plus the number of channels available at the site where the radio is located at that time.

INCLUDING
PROTECTIVE COVER

Experience our products online!

We know you're looking for the best sound solution for your line of work! Unfortunately, it's virtually impossible to experience our sound remotely – this can really only be done LIVE. In order to give you as clear of an idea as possible, we are working hard on creating an online environment that will enable you to enjoy the experience as true-to-life as possible.
